EXPERIENCE

Software Engineer Irongrove LLC

Jan 2026 - Present

- Architected and built a database migration (Microsoft Access to Azure SQL) — schema design, dual-instance infrastructure, data migration, and the client-facing frontend — serving as primary point of contact for delivery
- Designed and built a 12-agent AI client intake pipeline with model routing across Claude Haiku, Sonnet, and GPT-4o
- Conducted a full code audit of a client-facing application (React/Tailwind stack), producing technical findings and an executive summary for leadership
- Ran an M365 email infrastructure audit, resulting in leadership-approved mailbox consolidation
- Serve as Scrum Master, coordinating sprints and delivery across the development team

Software Engineer Ditch | Remote

Oct 2023 - Feb 2025

Ditch is an early-stage startup that helps people get out of debt faster by sending round ups directly to their debt.

- Monitored and maintained cloud functions on Google Cloud, resolving bugs and performance issues to ensure system reliability
- Mentored two college interns on coding best practices and the team's tech stack
- Resolved customer support inquiries by analyzing data to identify and address user-reported issues
- Maintained API versioning across systems to ensure seamless integration
- Designed and implemented frontend features to improve product functionality and user experience

Teacher's Assistant DigitalCrafts

Apr 2023 - Feb 2024

- Provided project feedback, alternative problem-solving approaches, and debugging guidance to bootcamp students
- Delivered weekly 1-on-1 mentoring to three students, tailoring support to individual pacing and skill gaps

Assistant Language Teacher JET Programme | Nagano, Japan

Jul 2017 - Jul 2022

- Built and maintained a 6th-grade English curriculum over four years
- Taught English grammar and vocabulary alongside cultural lessons introducing students to life outside Japan
- Tutored 1–2 students daily in English conversation outside class hours
