## Work Experience

### Senior Full Stack Software Engineer

December 2025 – Present

HolonHealth

Remote

- **Led** a complete overhaul of the cash reward system, migrating from **RAPID! Cards** to a points marketplace powered by **All Digital Rewards**, modernizing rewards delivery for 60,000+ clients
- **Designed** a new **Points Ledger** system from the ground up to support the migration to a points-based marketplace, ensuring accurate, auditable transaction tracking across the platform
- **Rebuilt** the scheduling **calendar** in **React** with **Redis caching** to eliminate redundant refetching, cutting load times from 6 seconds to near-instant and removing scroll lag for Case Managers and Evaluators
- **Developed** scalable server-side infrastructure using **Go** integrated with **PostgreSQL** and **Redis**, containerized via **Docker** on **AWS** to power a medical care ecosystem for over 60,000 users
- **Spearheading** the architectural design and end-to-end build of the organization's debut **mobile application** utilizing **React Native** as one of two senior engineers driving its architecture

### Full Stack Software Engineer

June 2024 – Nov 2024

Louisiana Department of Education

Remote

- Led 3-person development team in full-stack development of education data platform
- Optimized database indexing and queries, reducing report generation time from 45 seconds to 36 seconds for 69 school districts
- Built and deployed 20+ secure data exchange features using **.NET** and **React**, enabling real-time data sharing across 69 school districts and reducing processing delays by 50%
- Modernized a large legacy codebase by refactoring inefficient **stored procedures** and **C# API** routes, reducing average API response time from 2.3s to 1.5s
- Engineered automated **SQL data pipelines**, eliminating 15 hours of manual data processing weekly

### Full Stack Software Engineer (Contract)

July 2024 – February 2025

Resonite

Remote

- Redesigned tournament platform UI using **NextJS** and **Tailwind**, improving user satisfaction by 40% and reducing bounce rate from 35% to 20%
- Built team and player management features using **Golang API**, supporting 500+ tournament participants with **real-time data synchronization**
- Resolved 15+ critical **NextJS** performance bugs, reducing page load times by 60% and eliminating 3 user-reported payment errors
- Implemented **dynamic** theme system with **hot-swapping** capability, enabling tournament organizers to customize branding in under 30 seconds vs previous 2-hour manual process

### Full Stack Software Engineer

January 2023 – April 2024

Two Fish Creative

Remote

- Built high-performance **Flask RESTful APIs** handling 50,000+ daily requests with 99.5% uptime
- Implemented **Redis caching** strategy, reducing API response times by 70% and cutting server costs from \$800 to \$560 monthly
- Built **responsive mobile apps** using **React Native** and **Redux** for 3 clients, increasing average session time by 35% and user retention by 25%
- Integrated **GPT API** to automate analysis of 100,000+ user interactions, reducing manual reporting time from 10 hours to 30 minutes weekly
- Optimized legacy systems through improved caching and database query patterns, boosting performance by 30%
- Mentored 2 junior developers in **React Native** and **Python**, achieving 100% on-time project delivery and reducing production bugs by 47% over 6 months
- Led **end-to-end** deployment of backend services to **AWS** with **CI/CD pipelines** and launched two **React Native** applications to app stores

## Technical Skills

**Languages:** Python, HTML5, CSS, SCSS, Javascript, Typescript, NodeJS, Go, C#, SQL

**Frontend:** React, React Native, NextJS, jQuery, TailwindCSS, SCSS

**Backend:** Node.js, Express.js, Django, Flask, Gin, SQLAlchemy

**Databases:** MySQL, PostgreSQL, MongoDB, Redis

**DevOps & Cloud:** AWS, Azure, GCP, Docker, CI/CD, Git, Bash

## Education

Georgia State University

Bachelor of Science in Biology

Atlanta, GA
