PROFESSIONAL EXPERIENCE

JPMORGAN CHASE — SOFTWARE ENGINEER II

Plano, TX | October 2022 – Present

- Develop and support enterprise applications within Customer and Consumer Banking for digital forms and letters onboarding and archival, supporting an ecosystem of 100+ forms.
- Designed and developed a production feature enabling users to complete and sign multiple forms within the application; served as the sole developer and primarily developed the Angular frontend.
- Designed and implemented a self-service form onboarding and maintenance system based on an existing letters solution, enabling product teams to onboard and update forms without developer involvement.
- Solely designed and developed a production feature enabling users to complete and sign multiple forms within the application, primarily using Angular.
- Update and deploy AWS infrastructure using Amazon S3, ECS, EKS, RDS, and CloudWatch, while performing application and dependency version upgrades.
- Deploy application code and infrastructure changes to production and provide production support through application health checks, troubleshooting, and issue investigation.
- Participate in firmwide resiliency exercises by performing multi-region AWS failover testing and collecting evidence to validate application recovery capabilities.

GMR PROTECTION RESOURCES — SOFTWARE TEST ENGINEER

Dallas, TX | January 2022 – July 2022

- Created and executed daily software test cases covering user acceptance criteria and validating new features prior to production release in an Agile environment.
- Collaborated with developers and stakeholders to define testing requirements, test coverage, and acceptance criteria for new software features.

EDUCATION & CERTIFICATION

AWS Certified Cloud Practitioner

Web Development Bootcamp — DigitalCrafts, Houston, TX | 2021

Bachelor of Science in Marketing — Pensacola Christian College, Pensacola, FL | 2016
