Houston, TX, US

Product and Business Analyst with 4+ years of experience delivering system modernization initiatives and multimillion-dollar application redesigns. Experienced leading Agile delivery, defining product roadmaps, conducting UAT, and using AI-assisted tools to accelerate solution design, prototyping, and stakeholder communication. Skilled in presenting and training stakeholders—from end users to executive directors—in person and virtually.

Work Experience

Product Analyst

Sep 2025 – Present

Region 4 Education Service Center | Houston, TX

Led the successful launch of a next-generation event management platform for Region 4. Led product strategy, module design, requirements gathering, cross-functional delivery, and marketing efforts while collaborating with developers, stakeholders, and leadership to deliver core platform functionality and support long-term statewide adoption.

- Led initiative to replace manual attendee sign-in sheets with a fully automated QR code attendance tracking system serving 400–500 attendees per event, reducing processing time by 15–20 hours per large event, improving attendance accuracy, and driving organization-wide adoption across the center.
- Used AI-assisted tools, including Claude, to design business workflows and solution mockups, and used Vercel to build interactive prototypes presented to stakeholders as proposed solutions; used Cursor to code basic UI components and screen flows to validate concepts quickly.
- Led requirements gathering and developed large-scale implementation plans for regional customer rollouts, accounting for region-specific platform customizations across multiple education service center customers.
- Led product demos and training sessions for stakeholders, directors, and executive directors, both in-person and virtually, supporting platform adoption and buy-in.

Technical Business Analyst

Apr 2024 – Sep 2025

Region 4 Education Service Center | Houston, TX

Supported a \$2M+ enterprise platform modernization initiative transitioning legacy systems to scalable architecture.

- Coordinated cross-functional teams across development, QA, and leadership. Conducted user training sessions and product demonstrations.
- Facilitated meetings with clients and stakeholders to gather and document business requirements, and provided time estimates for project-related tasks.
- Provided production support and managed defect and enhancement intake.

Business Analyst

Nov 2021 – Apr 2024

Manhattan Life Insurance Company | Houston, TX

Led business analysis efforts for a large-scale modernization initiative at ManhattanLife to redesign and enhance the company's agent application and enrollment platform.

- Supported the successful migration from a legacy system architecture to a modernized platform enabling agents to apply for onboarding, enroll, manage product offerings, complete applications, and process payments through a streamlined digital experience.
