PROFESSIONAL SUMMARY

Junior full-stack developer experienced in delivering end-to-end features, designing secure and scalable backend systems, and building intuitive user experiences. Strong background in API development, authentication, automation, and workflow optimization. Brings a detail-oriented mindset, clear communication, and a collaborative approach to solving complex problems and contributing to team success.

KEY SKILLS

- **Frontend:** Java, HTML, CSS, JavaScript, TypeScript, React, Vue.js, Next.js
- **Backend:** Node.js, Express.js, RESTful APIs, PostgreSQL, Supabase, Webhooks
- **Tools & Integrations:** Stripe, LaunchDarkly, SendGrid, MCP, Claude Code, Cursor IDE, Langchain
- **Authentication & Authorization:** Supabase Auth, JWT, RLS
- **Software Practices & Methodologies:** OOP, Prompt Engineering, Agile

PROFESSIONAL EXPERIENCE

Junior Software Developer Oct '25 - Present
Irongrove LLC Remote

- **Full-Stack Feature Delivery:** Designed and delivered full-stack functionality across Next.js, Node/Express, and PostgreSQL, building reliable UI components, API endpoints, and database logic that supported production-grade workflows and smooth user experiences.
- **API Architecture & System Design:** Built secure, maintainable Express-based services with structured TypeScript interfaces, authentication flows, validation layers, logging utilities, and shared contracts that improved consistency and reduced integration friction.
- **Data Handling & Authentication:** Implemented Supabase for authentication and data operations, creating efficient Postgres table designs, applying Row-Level Security (RLS), and enabling realtime features and file storage solutions to support secure, multi-tenant behavior.
- **Payment Processing & Automation:** Set up automated billing operations using Stripe subscription tooling, webhook-driven synchronization, and idempotent request patterns to support dependable customer lifecycle management and reduce billing errors.
- **AI-Driven Workflow Optimization:** Incorporated AI-assisted developer tools such as Cursor and Claude to streamline debugging, accelerate refactors, and enhance internal development workflows—including building integrations compatible with MCP-based systems.

Luthier Dec '21 - Mar '24
All Strings Attached Golden Valley, MN

- **High-Precision Instrument Repair:** Completed repairs on over 2,000 instruments, specializing in bridge carving, sound post adjustments, and new instrument setups
- **Restoration:** Performed intricate repairs on over 100 highly valuable violins & violas using techniques such as gluing, varnishing, crack repair, bridge carving, & sound post adjustment
- **Cross-Functional Collaboration:** Worked with team of three & leveraged industry best practices to establish retirement criteria for rental instruments, optimizing decision-making process

EDUCATION

Java Bootcamp Mar '24 - Jun '24
Tech Elevator Remote

- Graduated from a full-stack bootcamp with 800+ hours of education designing complex web-based software systems in Java

Diploma in String Instrument Repair Sep '20 - May '22
MSC Southeast Red Wing, MN

- Certified with a diploma in violin repair and completed an optional course in violin making

Bachelor's Degree in Violin Performance Sep '18 - Dec '19
Maranatha Baptist University Watertown, WI

- Took 60+ credit hours towards a violin performance major
