

Tab 3-2 — Key Personnel Resumes

Joseph Frasier — Program Manager / Lead Architect (Key Personnel)

Frasier Digital, LLC · Tomball, TX · joseph@frasierdigital.com · (850) 356-2382

Summary

Founder and principal of Frasier Digital with 11+ years of software engineering and delivery leadership across government-facing, education, and enterprise platforms. Program manager and lead architect on the proposed VAERS modernization: personally architected and built the working prototype submitted with this quote. Career pattern matches this contract's shape — new-build, public-facing, data-quality-critical applications delivered by small named teams under fixed schedules, with privacy-sensitive data handled correctly from the first commit.

Role on this contract

Program Manager / Lead Architect and Security & Compliance Lead (combined 0.55 FTE, key personnel): single point of contact for the CO/COR; owns architecture, deliverable schedule, the SA&A/ATD documentation path and EPLC stage gates, risk register, and bi-weekly technical reviews. Author of the Tab 2-2 prototype.

Relevant experience

Frasier Digital, LLC — Founder & Managing Member / Program Manager · 2024–present

- **Region 4 Education Service Center (Houston)**, Jul 2024–Oct 2025: PM and developer on a certification training platform built from scratch — SCORM Cloud API integration, full authentication backend, course ingestion and validation, completion tracking — serving thousands of non-technical users across all Harris County school districts and other entities dependent on Region 4's training system. No inherited codebase; delivered to production and operated. **[FLAG: engagement value reference per Tab 4 rule]**
- Federal proposal and prototype delivery practice: working evaluation prototypes with live AI-assist features behind deterministic safety guardrails, automated 508 testing in CI, open-source posture per M-16-21.

PwC — Senior Software Engineer (AI implementations) · 2026–present

- End-to-end AI implementations for Fortune 100–500 clients: full-stack build, solution architecture, design, CI/CD, and maintenance. Production discipline for LLM-backed features: structured outputs, guardrails, evaluation, cost controls — directly applied to this contract's intelligent-assistance layer.

Louisiana Department of Education (via Insight Global) — Senior Software Engineer · Jul 2024–present

- Maintains and extends C++ computational models at the core of Louisiana's statewide education data processing (performance, memory, numerical correctness), plus the surrounding .NET/C#/SQL Server platform and T-SQL data pipelines — statewide-scale government data quality as a daily job.

Perdoceo Education Corporation (via DigitalCrafts) — Lead Instructor / Senior Software Developer · Jan 2021–Jan 2024

- Canvas LMS engineering across the Perdoceo enterprise: integrations, automation, and platform work for a national online-education operation.

Mailchimp (via Tensure) — Software Engineer, Generative AI · Jan–Jun 2024

- Shipped production generative-AI features at consumer scale.

Deloitte — Software Engineer · Apr 2020–Jan 2021

- USDA-facing crop-inspection scheduling application (mobile + desktop) — federal field-user UX and delivery cadence.

Earlier engineering foundation · 2015–2020

- **EOG Resources** (Sep 2018–Apr 2020): company-wide water/gas/oil production monitoring and forecasting platform; front end plus C++ water-production model integration; Mapbox scenario visualization; onboarded 50+ users.
- **WeWork** (Apr 2019–Apr 2020): React/TypeScript internal and customer-facing apps.
- **Ecotone** (Jan 2015–Sep 2018): front-end JavaScript/React, Node/Express.
- Concurrent engagements presented per-engagement.

Skills

TypeScript/JavaScript, React, Node.js, C++, C#/.NET, SQL (SQL Server/PostgreSQL), T-SQL pipelines; Azure + AWS; CI/CD (GitHub Actions); LLM integration with structured outputs and safety gating; Section 508/WCAG engineering; SCORM/LMS ecosystems; federal deliverable and compliance documentation (EPLC, SA&A artifact preparation).

Education

B.S. Business Management (minor, Business Technology), Pensacola Christian College, 2013 — including three years of computer science major coursework. The Iron Yard immersive software engineering program, 2017.

Ryan Daley — Technical Lead, Healthcare IT (Key Personnel)

Houston, TX · ryandaley321@gmail.com · (832) 998-0924

Summary

Technical lead and senior software engineer with 7+ years building production web platforms, including member-facing healthcare applications at national-payer scale (Optum/UnitedHealthcare) and healthtech platform engineering (Shuttle Health). Owns architecture, CI/CD, and release quality on rapid-delivery teams; testing discipline to 90%+ automated coverage; accessibility (ADA/508) built into the pipeline rather than audited afterward. On this contract: day-to-day engineering lead accountable for release quality across Alpha, Beta, and Final.

Role on this contract

Technical Lead — healthcare IT (0.25 FTE, key personnel): owns engineering execution, code review standards, CI/CD gates (unit, integration, accessibility, cross-viewport), defect triage SLAs, and bi-weekly build delivery to the CDC repository.

Relevant experience

PwC (Vanguard team) — Senior Software Engineer · Apr 2025–present

- Rapid AI-integrated prototypes for Fortune 500 clients: React/Next.js/TypeScript with LLM integration; owns CI/CD for the team. The prototype-to-production cadence this contract's 21/45/90/150-day clocks demand, practiced weekly.

Shuttle Health — Senior Software Engineer (healthtech) · 2022–2024

- Micro-frontend platform architecture for a healthcare startup; AWS API Gateway, Lambda, S3, Elasticsearch; drove automated test coverage above 90%. Healthcare product engineering end-to-end: data sensitivity, reliability, and iteration speed together.

Optum / UnitedHealthcare — Software Engineer · 2021–2022

- Built **ADA-compliant member-facing UIs** at national-payer scale on Azure with Jenkins/Terraform pipelines — direct precedent for this contract's 508-conformant, Azure-hosted public experience.

Bank of America — Software Engineer · 2020–2021

- React front ends with Java Spring Boot services in a regulated, review-gated enterprise environment.

IBM — Software Engineer · 2019–2020

- Real-time operations dashboards; Watson NLP integration.

Stellar Digital — Co-founder · 2017–2018

- Client web delivery; end-to-end ownership from requirements to production.

Skills

TypeScript/JavaScript, React, Next.js, Node.js, GraphQL; PostgreSQL, MySQL, MongoDB, Elasticsearch; Azure and AWS; Kubernetes, Docker, Terraform; GitHub Actions and Jenkins CI/CD; testing with Vitest/Jest/Playwright; accessibility engineering (ADA/WCAG/508); secure SDLC in regulated environments.

Education

Flatiron School, software engineering immersive, 2019. The Iron Yard, software engineering immersive, 2017.
