How we prefer to work

Fixed-price workstream (default). You hand us a bounded scope: a feature, a pipeline, a dashboard, a modernization sprint. We return a fixed price, a named team, and milestone dates within five business days. Payment on milestone acceptance. This is how most of our work is priced and it keeps your margin predictable.

Hourly, when scope is open. Labor-hour at the rates below, monthly invoicing, weekly burn report against a not-to-exceed you set.

Labor categories and rates

Principal — Solution Architect	Joseph Frasier, Managing Member. Enterprise AI delivery (PwC), production generative AI (Mailchimp), enterprise platforms (EOG), federal proposals and PM.	\$175
Principal — Delivery Lead	Alan Hong. Tech lead and PM across seven-application portfolios; AI education products in production (RNL); enterprise Azure; FAA federal service.	\$165
Senior Engineer	Full-stack, data, or AI/ML engineer with 8+ years; React/Next.js, Python, .NET, SQL Server/PostgreSQL, Azure/AWS.	\$145
Engineer	3 to 7 years; delivery under a principal or senior.	\$120

Fully loaded, remote delivery, US-based staff. Travel only if your contract requires it, billed at cost under FTR. Rates hold for the base period of any subcontract signed within 90 days.

Included at every tier

Named people you approve, who stay on your program. CI/CD and automated tests as acceptance criteria, SAST/DAST/SCA in the pipeline. Weekly written status in your format. Section 508 / WCAG 2.1 AA on any user interface. Signature on C-SCRM, the CISA SSDF attestation, FAR 52.204-21, and Section 889 representations without exception.

Set-aside math

Frasier Digital is a small business. On a total small-business set-aside our share is similarly situated under 13 CFR 125.6 and does not count against the 50 percent you must retain. On 8(a), WOSB, SDVOSB, or HUBZone set-asides it does count, and we scope accordingly, typically a single workstream at 20 to 30 percent of contract value.
